Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. **Claim 69 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.**

Claim 69 recites a system comprising logic per se. If logic is merely computer code, then the method fails to comprise any physical elements and the claims are directed toward a computer program claimed as a computer listing per se, i.e., the descriptions or expressions of the programs, are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. See MPEP 2106 IV.B.1(a).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claim 69 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Claim 69 recites the limitation "the best sales associates" in line 10. There is insufficient antecedent basis for this limitation in the claim.

It is unclear in claim 69 line 16 regarding "each best sales associate". It is unclear if this is relating to "each of the best sales associate" or to "each of another group of best sales associates".

It is unclear in claim 69 line 18 regarding "the sales associate". It is unclear which sales associate is being referred to. There is no prior recitation of a singular sales associate only associates.

Claim 69 recites the limitation "the matched sales associate" in line 23. There is insufficient antecedent basis for this limitation in the claim.

Claim 69 recites the limitation "the matched sales associate" in line 26. There is insufficient antecedent basis for this limitation in the claim.

Claim 69 recites the limitation "the particular sales opportunity" in line 27. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. **Claim 69, as best understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Bunting et al. (US Patent 6,134,530) in view of Hung et al. (US Patent 6,760,429).**

Bunting et al. discloses the claimed method for selling, as best understood, including gathering customer and product information, using this information along with sales associated information to find the best associates, provide the best associates an opportunity to assist the customer and if these associates do not assist the customer after a predetermined time, one of the best associates is selected and must assist the customer, where a connected associate is provided the customer and product information to assist the call;

but is vague regarding how the customer and session information, including product information, is entered into the system when the customer is interfacing the system via a web page, Bunting et al. discloses clearly that this information is collected via the VRU and forwarded to the sales associates. Hung et al. teaches that it is known in the art of web based agent backed systems to gather website session information, including product information, and customer information and forwarding this information to a sales associate to provide information to the associate that would be useful in servicing the customer (for example see column 6, lines 19+). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the method of Bunting et al. with the gather website session information, including product information, and customer information and forwarding this information to a sales associate as taught by Hung et al., in order to provide information to the associate that would be useful in servicing the customer.

Response to Arguments

7. Applicant's arguments with respect to claim 69 have been considered but are moot in view of the new ground(s) of rejection.
